geometry

wheel size	650c
wheel base	43" 110 cm
head tube angle	70°
seat angle	25-40°
seat height	24.5" 62 cm
medium BB height	32" 82 cm
size	X-seam (in / cm) 37-46 / 95-118

riders with X-seam lower then 37" / 95 cm have to order optional short boom
riders with X-seam higer then 46" / 118 cm have to order optional long boom

IMPROVED GEOMETRY

1. The new Slyway recumbent bikes frames have a shorter wheel base for a better control in corners.
2. Shorter rear frame, and smaller rear droppouts, in order to save weight and improve geometry.
3. Seat position is set a little back respect to the old frame. This give you a better weight distribution and great stability.
4. Morpheus seat is equipped with a new multi-pivot system.

THE BEST ERGONOMY

1. New Morpheus seat multi-pivot system (9 positions) allow you to adjust the bottom bracket - seat difference in height: this is very important to push on pedals in the best way.
2. Seat angle is also adjustable from 25° to 40° with 9 seatpost pivot point.
3. Morpheus seat feature an upper sliding section for perfect size adaptability and best comfort.

GREAT MECHANICS

1. Each frame is hand built in Bassano del Grappa, in small series, with attention to details and quality guaranteed by the craftsmanship.
2. New Morphues seat is 125 gr lighter than previous edition.
3. V-post CNC seatpost with an improved design, is 100 gr lighter than previous edition.
4. Bike frame is designed for a smooth and low friction chain line.
5. Rear droppout feature a replaceable rear derailleur hanger.
6. Long front derailleur tube, allow you to use oversize chain rings.
7. Aluminium alloy eccentric ring, allow you to micro-adjust the front derailleur position.
8. Derailleurs and brakes cables are inside the frame
9. Each bike is assembled and customized according to your own needs.
