geometry

wheel size	26
wheel base	43" 110 cm
head tube angle	70°
seat angle	25-40°
seat height	24.5" 62 cm
medium BB height	32" 82 cm
size	X-seam (in / cm) 37-46 / 95-118

riders with X-seam lower than 37" / 95 cm have to order optional short boom

riders with X-seam higher than 46" / 118 cm have to order optional long boom

IMPROVED GEOMETRY

1. The new Slyway recumbent bikes frames have a shorter wheel base for a better control in corners.
2. Shorter rear frame, and smaller rear droppouts, in order to save weight and improve geometry.
3. Seat position is set a little back respect to the old frame. This give you a better weight distribution and great stability.
4. Morpheus seat is equipped with a new multi-pivot system.

THE BEST ERGONOMY

1. New Morpheus seat multi-pivot system (9 positions) allow you to adjust the bottom bracket - seat difference in height: this is very important to push on pedals in the best way.
2. Seat angle is also adjustable from 25° to 40° with 9 seatpost pivot point.
3. Morpheus seat feature an upper sliding section for perfect size adaptability and best comfort.

SENSITIVE STEERING GEOMETRY

1. With 4 pull-bar pivots positions, you can adjust the steering speed, that perfect fit your riding style.
2. Oversize handlebar pivot with integrated double bearing headset.

GREAT MECHANICS

3. New Morpheus seat is 125 gr lighter than previous edition.
4. V-post CNC seatpost with an improved design, is 100 gr lighter than previous edition.
5. Bike frame is designed for a smooth and low friction chain line.
6. Rear dropout feature a replaceable rear derailleur hanger.
7. Long front derailleur tube, allow you to use oversize chain rings.
8. Aluminium alloy eccentric ring, allow you to micro-adjust the front derailleur position.
